DETAILED ACTION

1. This office action is responsive to the following communications: the Amendment after Non-Final Rejection, filed on December 26, 2006.
2. Claims 1-56 are pending in the present application. Claims 1, 15, 19, 30, 40, 45, 46, 51, are independent claims.

Response to Arguments

3. Applicant's arguments, see Applicant's Remarks, pages 12-17, filed December 26, 2006, with respect to claims 1-56 have been fully considered and are persuasive. Clarification of important subject matter has been achieved, and the rejections of claims 1-56 have been withdrawn.

Allowable Subject Matter

4. Claims 1-56 are allowed.
5. The following is an examiner's statement of reasons for allowance: regarding independent claims 1, 15, 19, 30, 40, 45, 46, 51, the prior art fails to teach a refresh device in which the refresh rate of the device is adjusted and controlled directly and solely based on the approximation of current leakage rather than the approximations of voltage levels, or other reference levels indirectly based on an approximation of current leakage. Claims 1, 15, 19, 30, 40, 45, 46, 51, are therefore deemed to be allowable over the prior art. Claims 2-14, 16-18, 20-29, 31-39, 41-44, 47-50, 52-56, are dependent on the allowable independent claims and are therefore also deemed to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Manning (5,392,251) is another example of a refresh oscillator in which the refresh timing is based on voltage levels indirectly based on the current leakage from a storage capacitor.
